Thermoregulation & Temperature Therapy Products

adroitmedical.com

ThermalX™ blankets and apparel are a low cost solution for warming before, during and after surgery, as well as for emergency rescue. The heat reflective material naturally preserves body temperature and prevent convective heat loss. ThermalX is suitable for all kinds of surgery and can help compliance with SCIP-Inf-10. Safe for use with X-ray equipment*. ThermalX does not use electricity and cannot burn the patient. Available in blankets, caps, leggings, mittens, booties, gowns, kits, and pediatric sizes.

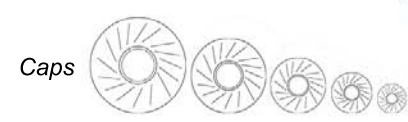

ThermalX is latex free, nonconductive, radio-translucent (does not obstruct X-rays) and safe in conjunction with laser surgery. *Thermal should not be used in MRI machines.

Item Description	Qty
041 OR Lower Body Blanket	25
061 OR Upper Body Blanket	25
101 Papoose	50
